

## An innovative solution to neutralize harmful microbes

2QR (pronounce: to cure) is a real break-through. A completely new approach to solve bacterial problems. It is entirely natural and derived from medicinal plants by a unique process of molecular filtration. Since 2QR is not based on the ANTI principle it offers an alternative to antiseptics and antibiotics.

- > Restoring human microflora
- > Bio-active bacterial blocking
- > Safe and natural
